

How to Pick the Right Kaftan for You?

If you are buying kaftan for the first time and you are confused about how to find the right attire for you, you are at the right place. We will help you with effective tips to find the right kaftan for you. Whether it is an embroidered kaftan tunic or you want to go for a kaftan- long dress, you can follow the following tips to **find a designer and gorgeous kaftan**. Read on to know more-

If you are a woman of medium size or large body shape, you can pick kaftans with bat wings or bell sleeves. If you are a petite woman, you can tailor the bell sleeves or go for other styles of sleeves so that they won't grab the main attention. Bat wings are the perfect type of sleeves for small-sized women.

Choose the Material

Pick the material as per your body type. If you want to flaunt your beautiful curves, go for materials that stick to your body. If you want, otherwise, you can go for a kaftan with multiple layers. You can pick materials like chiffon and net and layer them with cotton to have a perfectly blended kaftan.

It Must-be Well-fitted

Wearing well-fitted apparel can make you look great. If you get conscious of your curvy figure, kaftans can hide those well for you. But, if you want to flaunt it, fasten a belt or sash around your waistline. Make sure you don't wear a belt too tight to wear. Also, you should avoid wearing loosely-fitted kaftan if you have a petite body type. Oversized kaftan won't look good on you.

Hopefully, these tips are going to be useful if you are going to buy a kaftan for the first time. Choose the best types of kaftans as per your style.
