ABOUT US

Al Hendawy Medical Center is a medical center dedicated to offering everyone in need of our medical skills cutting-edge, precise, and reasonably priced medical care. It was founded in 2005 by renowned Egyptian pediatric consultant Dr. Ali Hendawy. At Al Hendawy, we apply our extensive academic training to provide the community with individualized, evidence-based healthcare services. Our group of skilled physicians, certified nurses, and paramedical personnel ensures that patients receive complete care with clinical accuracy, compassion, and the safest environment possible. Together, we all strive to give you the best possible care and comfort.

DERMATOLOGY CLINIC IN ABU DHABI

Treatments for dermatology encompass all aspects of skin, nail, and hair issues. The majority of people have ongoing issues with their skin and hair. The largest organ in our body is the skin. Our skin shields our bodies from the outside world. It serves as a barrier of defense. As a result, caring for the skin is equally as vital as caring for other bodily components. Skin and hair damage can result from exposure to climatic factors such as changing weather patterns, pollutants, aging, heredity, immune deficiencies, etc. These problems can develop into more complex diseases if they are not appropriately treated in a timely manner. It's critical to diagnose and treat it early on. A dermatologist is qualified to diagnose conditions and administer the appropriate care.
